The fruits are nearly round, weighing on an average of 6 ounces. The meat is extremely solid, with few seeds. Topsall ripens evenly, a bright scarlet-red all the way through. Being a heavy yielder and resistant to both blight and rust, it makes an ideal Tomato for table use and canning. Market gardeners like Topsall because it never fails to make them money. Although Topsall was only introduced by us in 1937 it has become the most popular Tomato in Central Missouri today. Like its name, it tops all.

ARCHIAS' DANDELION AND WEED KILLER

Kills noxious Weeds and Grasses and Fertilizes Lawns At One Treatment

Recent experiments with Nitrogenous Salts prove that noxious grasses and weeds such as Chickweeds, Dandelions, and other weeds, which ruin good lawns, may be killed with Archias' Weed Killer, which then fertilizes the soil for grasses of a desirable nature, such as Blue Grass, Red Top, etc. Do not use on Clover.

Will not harm Blue Grass and desirable lawn grasses in the quantities we recommend.

DIRECTIONS: Mix one (1) pound of Archias' Weed Killer to one gallon water. Sprinkle over 250 sq. ft. of lawn. Use this proportion up until March 15th. After March 15th, sprinkle the above mixture over 600 sq. ft. We recommend 4 to 6 applications in the spring at intervals of about a week apart. It is a gradual program and not an overnight cure.

Varieties Recommended by Missouri College of Agriculture

Write for More Complete Descriptions and Special Discounts—We Can Save You Money!

MISSOURI No. 8

Missouri No. 8 is a smooth soft yellow Corn preferred by feeders over a flinty hard type. It produces two ears under favorable conditions and is resistant to drought, insects and disease, maturing in 120 to 125 days. Missouri No. 8 has been tested in Missouri for many years and has proven year after year to be superior to the best open pollinated varieties under the same conditions. The average yield has been 36% better than Reid's Yellow Dent and over 22% greater than Midland Yellow.

MISSOURI HYBRID No. 47

This hybrid is very similar to the famous Illinois 960 except that it does not grow so tall. Probably best adapted to northern half or two-thirds of Missouri. No tests in Iowa or Illinois. Five to seven days later than Illinois 960. Stands up well, somewhat large stalk.

Certified and recommended by Missouri College of Agriculture as a satisfactory Earlier Maturing Variety. It is similar in pedigree to Illinois 960.

ILLINOIS HYBRID No. 960

Adapted to nearly all of Missouri, southern Iowa, northern Kentucky, southern two-thirds Illinois. Probably the most widely adapted hybrid in present production.

A hybrid of medium early maturity. Tends to two ears. Grows somewhat taller than many hybrids. Has good strong stalk, although the stalk is not as large as some hybrids. Good root system, and stands up well.

JEWETT HYBRIDS

Missouri produced and originated Corn for Missouri farms.

JEWETT No. 11. The most widely grown of the Jewett Hybrids. An extra long, well dentured ear. Consistent winner in yield tests. Drought and chinch bug resistant. Produces two ears; medium maturity, earlier than No. 2 and No. 6.

JEWETT No. 2. Has a very wide, deep kernel. A few days later than Reid's.

A fine soft feeding Corn—well adapted to the better soils.

JEWETT No. 6. An outstanding variety for both thin and fertile soil.

Medium late. Seed very limited.

PRICES: Flat grains, peck, \$2.00; 1/2 bu., \$3.75; bu., \$7.00.

Medium and small rounds, 1/2 bu., \$3.00, bu., \$5.50.

ARCHIAS' No. 501

A new Hybrid for Missouri that is rapidly proving its worth. A late maturing variety adapted to good Corn land, does equally well in the bottom as on rolling ground. One large, long ear of medium deep grains to stalk. Feeding qualities equal to Reid's and Mortgage Lifter. Supply very limited this season. Try this variety this year, if only a few rows for comparison.

NEW EVERBLOOMING Hardy Fuchsia Scarlet Beauty

New hardy variety producing hundreds of ruby-red pendulous flowers. An everbloomer—blooming all summer long until stopped by frost. Flowers just as freely in the full sun as in light shade. One of the most interesting plants ever introduced. Fine for flower borders, rock gardens, shady places where impossible to grow annuals, or for specimen plantings. Tops die down each fall, coming up abundantly the next spring. Mulch first winter. Each 65c, 3 for \$1.50.

Hardy Hydrangea Blue Boy

A lovely intense light blue Hydrangea of rare exquisite beauty, producing in abundance its glorious blue flowers in immense clusters that measure from 6 to 10 inches in diameter. While hardy in Missouri we recommend a light covering for winter protection. Without exception this Hydrangea is the finest all-blue flowering shrub in cultivation. We suggest to multiply the intensity of the blue color that in planting, a few rusty nails are placed in the hole before setting the plant, and a small amount of Aluminum Sulphate is applied around the plant each season.

Strong plants from 3-inch pots, each, 50c; 3 for \$1.25. Large plants, 85c; 2 for \$1.50, postpaid.
